

SWE Invigilation Duty Finder - Updated Project Guide

This package is a GitHub Pages-ready website customized for the Department of Software Engineering. It now includes the official SWE Midterm Summer 2026 duty roster and a pre-indexed roster data file so faculty can search by initial quickly and reliably.

What is included now

File / page	Purpose
index.html	Main duty finder. Faculty can search by initial, view duty dates, slot times, total duties, and download a personal duty summary image/PDF.
duty-roster.pdf	Official SWE duty roster: Duty Roster for SWE Department, Midterm Examination, Summer 2026.
roster-data.js	Pre-indexed data extracted from the uploaded roster PDF. This keeps search reliable even when browser PDF table parsing is inconsistent.
guidelines.html	SWE exam guidelines with Room 619, AB4 Building, Slot A/B/C timings, exchange sheet link, mobile phone warning, script checking reminders, and no-WhatsApp instruction.
committee.html	Clean demo committee page. Replace names, contacts, and photos later through committee-data.js and committee-photos/.

Roster and slot information

- Roster title: Duty Roster for SWE Department, Midterm Examination, Summer 2026.
- Indexed entries: 128 SWE roster entries from the uploaded PDF.
- Search method: faculty initial, because the roster lists initials and designations, not full faculty names.
- Slot A: 09:00 AM - 10:30 AM. Report by 08:40 AM.
- Slot B: 11:30 AM - 01:00 PM. Report by 11:10 AM.
- Slot C: 02:00 PM - 03:30 PM. Report by 01:40 PM.

Important guidelines used in the website

- Exam Control Room (DSC Campus): Room 619, AB4 Building.
- Faculty members should report at least 20 minutes before the assigned exam slot.
- Duty exchange must be arranged by the faculty member and recorded in the exchange sheet before the exam date.
- Collect answer scripts, question papers, attendance sheets, daily seat plan, top sheets, and other materials before going to the exam hall.
- Mobile phones are strictly prohibited in the exam hall for both students and faculty.
- Verify student ID card, admit card, clearance, and course teacher initials on answer scripts.
- Count and verify all answer scripts with the attendance sheet and top sheet before submission.
- For exam-time queries, call the exam committee. Do not post WhatsApp messages in the faculty group.

How to update real committee details later

- Open committee-data.js.
- Replace demo names, initials, roles, phone numbers, and emails with the approved committee list.
- Put real images in committee-photos/. Recommended size: square image, 300 x 300 pixels or larger.

- Update the photo field for each member, for example: `./committee-photos/member-name.jpg`.

Deployment

Upload all files to the repository root. Then enable GitHub Pages from Settings > Pages > Deploy from a branch > main > root. No server, database, PHP, XAMPP, or build step is required.
